

Transit X, LLC presents a preliminary proposal for a privately-funded fleet of fully-autonomous shared electric vehicles on local and regional podway network for

# Bandar Lampung, Indonesia

This proposal is downloadable at transitx.com/proposals/Transit X for Bandar Lampung,Indonesia.pdf

# High capacity · High speed · Nonstop · 24/7 Solar powered · Zero Wait · Door-to-door · Resilient

A 26-page companion Transit X Handbook is available at transitx.com/transitxhandbook.pdf

## **Proposal Overview**

Transit X proposes to build and operate a privately-financed pod network to carry passengers and freight for Bandar Lampung, Indonesia that makes the Transit X service convenient to 95% of the population.

Transit X efficiently services both suburbs and cities and provides for a higher quality of life. See transitx.com for more details. This 3-minute video (transitx.com/video) describes our innovative solution.

#### **Major benefits**

- Reduce congestion
- · Provide parking relief
- · Reduce pollution
- Improve safety

The Transit X Handbook (<u>transitx.com/</u> <u>transitxhandbook.pdf</u>) answers many questions about our service, the company, our technology, and the way we address:

congestion, parking, road safety, pedestrian safety, ADA compliance, sustainability, fares, solar+storage, construction, aesthetics, operations, economic development, quality of service, security, station footprint, equitability, carbon footprint, transit integration, resiliency, reliability, rights-of-way, and open space.

### Congestion, parking, pollution, and safety

Most regions suffer from traffic congestion, limited parking, air pollution, and unsafe roads. Potential solutions are costly, but Transit X can solve these challenges without public funding. Transit X can integrate into the built environment, providing both short term relief and a long term solution.

### No public funding

We have reduced or eliminated many costs of transportation including the cost of materials, land, construction, fuel, debt service, and labor. Transit X does not require public funding because revenue from fares more than covers our costs. Our business model appeals to investment banks and private equity firms that finance green infrastructure projects.

## Proven technology

Our team and partners have built fully automated systems that are now in operation around the world. Transit X may look unique, but the underlying design is very similar to systems that have been operating for 40 years with an exemplary safety record. An in-depth (1000+ hours) technical assessment and feasibility analysis has been completed by Altran, a global engineering firm with

extensive expertise in automated transit systems. The first pilots of Transit X will be deployed by the end of 2018.

Before any groundbreaking, the system will be safety-certified and fully insured.

## **Service Quality**

Transit X provides on-demand, last-mile service that is superior to cars or buses. An operating agreement will guarantee high levels of availability and reliability. Our use of small vehicles (pods) makes this possible. By reducing car use, Transit X creates walkable and bike-friendly neighborhoods.

### Less pollution: Air, Sound, Light, Visual, Water

Transit X offers a much higher quality of life by eliminating many forms of pollution. Pods are quiet and have no emissions. Pods offer less visual impact than the existing roads and vehicles, and utility lines can be hidden within the track. At night, there is no light pollution from headlights or taillights. Water pollution from road runoff is significantly reduced.

#### Sustainable

Transit X runs on 100% sustainable energy. The energy generated from solar panels on the track and stored within the poles is sufficient in most cases, but sustainable power contracts may used to buy and sell power to the grid. Transit X makes it possible to reduce the amount of impervious surfaces and increase green space by reducing the need for parking and roads. By replacing cars, Transit X has a negative carbon footprint.

#### **More Transit & Fewer Cars**

Transit X provides the convenience and privacy that people value in cars, yet without the negative impacts of personal cars. Transit X combines the best of mass transit and personal transportation modes which will lead to higher use of mass transit and less use of personal vehicles.

### **De-risking Projects**

Transit X is working with large, established firms to provide fixed-price contracts for the engineering, certification, construction, and operations of a Transit X system. Theses partnerships enable Transit X to de-risk all of the major elements of the project, and provide performance guarantees.

We would work with regional urban planning and construction firms who are familiar with permitting and applicable codes.

#### **Jobs and Workforce Development**

Many jobs will be created to build a new transportation infrastructure, and many new types of job will be created as transportation becomes more efficient. Municipalities that first embrace Transit X will be offered the opportunity to have Transit X manufacturing and assembly jobs in their area. The vast majority of the construction jobs will be locally sourced. Preferential hiring would be given to those workers displaced by the transition to automated vehicles.

#### **Revenue Generator**

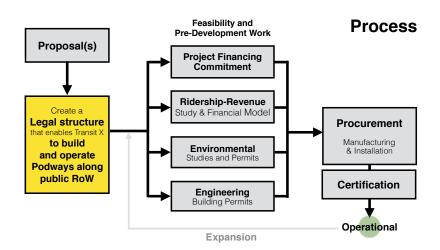

Not only does Transit X not require public financing, but the local municipality and right-of-ways owners receive 5% of gross revenue, which would be US\$28 million per year average over the first 10 years. For specifics, please see the "Taxes and Fees" section of this proposal. These fees and taxes paid by Transit X enables lower taxes or more spending on public services.

## **Short and Long Term Solution**

A project could be operational within 24 months from the start of a project. Transit X offers a rapidly-deployable solution that provides long term benefits. We would form a local company to build, operate, and maintain the network. At least 75% of the profits would be invested back into the region.

### **Moving Forward**

The diagram shows our general process for working with a municipality or rights-of-way owner. We would refine a proposal to meet your needs, then ask for a letter stating that you would like to move forward with a proposal that includes air rights and and an operating agreement. Example documents and a sample project schedule can be viewed at transitx.com/process

#### **Evaluation**

Please review our preliminary proposal, and then ask us any questions. We would be happy to provide further information, address specific concerns, or meet with specific people or groups. Any routes or coverage areas shown on the map are only preliminary suggestions and actual routes would be determined based on needs, rights-of-ways, utility corridors, location of trees, and many other factors.

We expect this proposal to be reviewed by one or more committees or working groups. Familiar transportation options, such as buses, light rail, subways, and ride-sharing services (including autonomous vehicles) may have already been considered. Very few options offer the convenience of cars with at least the capacity of buses, and most, if not all, require public funding and subsidies.

Private cars have a dominant mode share because people like the privacy and convenience of a car — despite the significant risks and negative impact associated with them. People won't give up their cars unless the alternative is both better and cheaper. That is what Transit X can provide.

We hope you agree that this proposal offers a way to address your challenges in both the short and long term, providing an option that is better and lower risk than any alternative — including continuing with the status quo.

Whatever process you use to evaluate this proposal, Transit X is open to working with you on refining this proposal to meet your needs. We hope you will conclude that moving forward with Transit X is an excellent opportunity to meet your current and future challenges.

Once we agree to move forward, we need a memorandum of understanding (example at <a href="mailto:transitx.com/process/mou.html">transitx.com/process/mou.html</a>) stating that you intend to pass an ordinance that enables our use of air rights along with an operating agreement.

The buildout of the network would be rolled out in phases, where a first phase could be a 15 to 30 km pilot.

#### **Other Resources**

The links below provide general information about Transit X:

- 2 minute video overview (transitx.com/video)
- Transit X Handbook (transitx.com/transitxhandbook.pdf)
- · Letters of Project Financing, Due Diligence, Contracts (transitx.com/letters.pdf)
- Example Resolution (transitx.com/process/resolution.html)
- Operating Agreement (<u>transitx.com/process/operating\_agreement.html</u>)
- General Q & A (<u>transitx.com/QandA.html</u>)

#### Addendum

The remaining pages of this proposal provide project-specific details:

- Project Overview and Impact pages 6 and 7
- Taxes and Fees pages 8 and 9
- Fares page 10 and 11
- Financial Project Summary with Pro Forma pages 12 and 13

We look forward to working with you to improve the quality of life for Bandar Lampung through better transportation.

Sincerely,

Mike Stanley CEO, Transit X

## Impact of proposed network

1	Reduction in GHG emissions (metric tons CO2-eq)	790,825 MTCO2-eq annually
2	Estimated cost to maintain public roadways	\$23,101,751 annually
3	Reduced waste products	128,334 metric tons annually
4	Travel time saved	413 hrs/person annually
5	Cost savings from reduced car ownership	\$4,641 per person annually
6	Increase in household income from time savings and car costs	88%
7	Reported injuries avoided	4,965 annually
8	Lives saved	50 annually
9	Land freed from parking (4,551 acres)	18,419,218 m <sup>2</sup>
11	Health care savings	High

## **Model Inputs**

	Model Inpu	ıts		
15	Ratio of road length to track length	4		
16	Walking speed	4.9	km/h	
17	Width of convenient swath along track	0.82	km	
18	Fixed cost per km. Solar+storage not included.	\$2,790,000	40,176,000	K IDR
19	Water crossing: additional cost per km	\$8,370,000		
20	Triple-speed: additional cost per km	\$5,580,000		
21	Rate factor for water crossings or high-speed links.	2.2		
22	Average distance traveled per person per year (for trips under 1600 km)	10,000	km	
23	Average distance per day per person	27	km	
24	Mode share % of people convenient to Transit X	85%	at 5 min walk.	
25	Percentage of daily demand during peak hour	20%		
26	Maximum capacity per track	41,062	pph	
27	Average dwell time during peak hour		seconds	
28	% of pods traveling on route with highest demand	18%		
29	Average speed of pod	72	km/h	45 mph
30	Average # of trips for a daily customer		per day	
31	Average passengers per pod during peak hours		passengers	
32	Average passengers per pod		passengers	
	Average discount per passenger	26%	policionigona	
33	Maximum passengers per pod		passengers	
34	Empty pods: Percentage non-revenue	25%	passongers	
35	Ex-Factory cost per pod	\$5,000	72,000	K IDB
36	Worldwide Median Income per Household (US\$)	10,000	144,000	
37	Average number of residents per household	2.3	111,000	K IDR
38	Base fare per km	\$0.07	1.1	K IDR
39	(per mile)	\$0.12		KIDR
40	O&M as % of project cost	5%	1.7	KIDIT
41	Percentage debt financed	70%		
42	Length of loan/debt		years	
43	Interest rate for debt	5%	youro	
44	kg CO2 emissions per liter of gasoline	2.37		
45	Monetary value of 1 hour personal time (USD)	\$2	22	K IDR
46	Eat. roadway maintenance per year per km	\$51,000	734,400	
47	Area of one parking lot space		m <sup>2</sup>	T IDIT
48	Commercial income of land (annual)		per m <sup>2</sup>	K IDR
49	Distance from roadway that is convenient	0.25		T IDIT
50	Stops per km	4.0	KIII	
51	Solar panel area per meter of track	2.0		
52	Cost of sustainable energy and storage		per kWh	
53	Global Horizontal Irradiance (GHI)		kWh/m²/day	
54	Cost to generate sustainable energy	\$1,000	,	
	Storage per column		kWh	
55	Typical span	23		44
56	Energy storage cost		per kWh	
57	Energy storage cost		days	
58	Area of parked pod	2.20	•	
59	Distance discount at max distance	40%		
60	Max distance discount	500	km	
61	Max usage discount at 10,000 km per capita	50%	MII	
62	Shared Pod Discount	20%		
63	Shared Pod Compartment Discount	40%		
64	Mode share starting discount	40% 67%

## **Model Inputs (continued)**

66	Name of region or project	Bandar Lampung, In
67	Currency name	K IDR
68	Equal to US\$1	14.4
69	Sustainable energy/electricity generation & storage as	CAPEX
70	Land area of region (sq. km)	118
71	Number of residents in region	1,166,761
72	% travel within region	85%
73	% of land area served by roads	95%
74	Coverage: % of pop. convenient (5 min walk) to Transit X $$	95%
75	Median household income (US\$)	\$6,000
76	Convenient walk time to stop (min)	5
77	Triple-speed route length (km)	0
78	Water crossing route length (km)	0.0
79	Visitors per year	0
80	Average length of visit (days)	2
81	Solar production ratio	1.57
82	Regional Fare Factor	1.0
83	EPC costs & contingency	30%
	Triple-speed (km/h)	242

## Pod & Car

		Pod	Car
85	Service life (years)	20	12
86	Full cost of vehicle per year	\$200	\$9,000
87	Public cost to maintain infrastructure (per km)	\$0	\$100,000
88	Energy Efficiency in MPGe	1188	24
89	Energy Efficiency in liters/100km	0.20	9.8
90	Energy used (Watt-hours/km)	28	1375
91	mass of CO2 per vehicle per km (kg)	0	0.09875
92	Vehicle mass (kg)	45	1950
93	Average speed of urban travel (km/h)	72	16
94	Typical travel time (in minutes) for 8 km trip	6	29
95	Fare/cost per km	\$0.07	\$0.62
96	Number of deaths per 100M passenger-km	0.00001	1
97	Number of injuries per 100M passenger-km	0.0006	62
98	Volume to park (cubic meters)	5.7	70.9

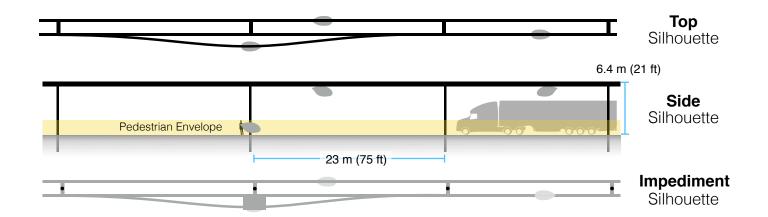

4% of gross revenue proportioned to air rights owners and a municipal fee/tax of 1% of gross revenue. Both air rights and fee/tax have a minimum payment based on the Footprint and the Transit X Commercial Rate (TXCR).

## Municipal rates

	-		
2	Total commercial land (estimated)	11,210,000 m <sup>2</sup>	
3	Total commercial muni revenue (US\$)	\$1,345,200	19,370,880 K IDR
4	TXCR (Transit X Commercial Rate)	\$0.12 per m <sup>2</sup>	1.7 K IDR
5	TXCR is the yearly tax rate per land area. Calculation: total land area of commercial properties in the municipality, divided by all the municipal income generated by those properties. The TXCR is used to calculate the minimum tax/ fee.		
6	Project Revenue		
7	Length of Transit X route	130 km	
8	Estimated gross revenue per unit length	\$6,370,080 per km	91,729,151 K IDR
9			
10	Government Tax	% of gross revenue with minimum.	
11	1% gross revenue	\$63,701 per route-km	917,292 K IDR
12	Minimum per year	\$198 per route-km	
13	Air Rights Leasing Fee	% of gross revenue with minimum. Pr	roportioned based on length.
14	% of route on municipal land	90%	
15	4% gross revenue	\$254,803 per route-km	3,669,166 K IDR
16	Minimum per year	\$198 per route-km	
17	Taxes, Fees		_
18	Paid to Municipality	<b>\$38,210,886</b> per year	550,236,753 K IDR
19	with minimum	\$49,129	
20	Paid to Private land owners	<b>\$3,322,686</b> if 10% of RoW is	over private property
21	with minimum	\$2,586

## **Fair Fare Formula**

## Summary

The average commute would be 3.5 times faster saving each commuter 295 hours per year.\*

At 0.64 K IDR per km, a typical commute on Transit X is 17% less than public transit and 74% less than a Taxi.\*

Al	I prices in K IDR	2 km	10 km	40 km

Base fares are set for first 5 years, then adjusted by formula. A 20% discount on a shared pod and a 40% discount on a shared compartment. Trips are discounted proportional to their length reaching a maximum of a 40% discount on a 500 km trip. No congestion-based pricing. Fares are proportional to the median income of the area and inversely proportional to per capita use, so the more use of Transit X, the lower the base fare up a to 50% discount. The amount of market-rate fares must be equal or less than the amount of discounted fares. Transit X Fair Fare is a universal passenger fare formula that applies to all regions and all times.

ts

## **Fair Fare Formula**

## Fare rates are updated annually using this formula

	Formula Name	Value	Units	Description of the value or model input
1	GlobalIncome	144,000	K IDR	Global median household income. Updated annually based on most recent standard published data.
2	AllTravel	23,000	km	Travel distance per household per year on any mode for trips under 1600 km. A global constant
3	PercentIncomeForTransport	20%		% of median household income for all transportation under 1600 km trips. A global constant.
4	GlobalRate	1.25	K IDR/km	Global rate: GlobalIncome * PercentIncomeForTransport / AllTravel
5	MedianIncomeOrigin	\$86,400	K IDR	Median household income at origin. External input. Based on reliable public data source updated annually.
6	MedianIncomeDest	\$86,400	K IDR	Median household income at destination. External input. Based on reliable public data updated annually.
7	RegionalRate	0.75	K IDR/km	Regional rate based on median income:  MedianIncomeOrigin * PercentIncomeForTransport / AllTravel
8	UnderIncomeRate	0.50	K IDR/km	Under global income adjustment: if (RegionalRate < GlobalRate, GlobalRate - RegionalRate, 0)
9	NominalRate	1.25	K IDR/km	Nominal rate: RegionalRate + UnderIncomeRate
10	RegionalFactor	1.00	K IDD#	Regional Fare Factor. Negotiated upfront to make network financially viable.
11	AdjustedRate	1.25	K IDR/km	Regional adjusted rate: NominalRate * RegionalFactor
13	Population	1,166,761		Population in region. Updated annually based on trusted public data source.  Fare Discount when Transit X travel per household equals AllTravel. Global
12	UsageMaxDiscount	50%		constant.
14	PassengerTravel	8,008,355,814	km	Total passenger distance traveled previous calendar year. Based on expected mode share for first 3 years. Based on actual passenger trips. Audited.
15	ModeShare	30%		Percent of Total Travel Per Capita on Transit X:  PassengerTravel / (Population x AllTravel)
16	BaseRate	1.07	K IDR/km	Base rate for single-passenger pod (without discounts) (1 - UsageMaxDiscount x min(1,ModeShare)) x AdjustedRate
17	SpecialRateFactor	2.20		Rate factor for water crossings or high-speed links. Global constant.
18	SpecialBaseRate	2.34	K IDR/km	Base rate for high-speed travel or water crossings:  BaseRate * SpecialRateFactor
19	DistanceDiscount	40%		Distance discount at max distance. Global constant.
20	MaxDistanceDiscount	500	km	Max distance discount. Global constant.
21	DistanceDiscountPerKm	0.000852	K IDR/km	Discount amount per km:  BaseRate x DistanceDiscount / MaxDistanceDiscount
22	SeniorDiscount	20%		Senior discount set according to local regulations
23	StudentDiscount	20%		Student discount set according to local regulations
	DisabilityDiscount	20%		Disability discount set according to local regulations
24	DiscountBaseRate	0.85	K IDR/km	Discounted base rate: BaseRate x (1 - SeniorDiscount)
25	SharedPodDiscount	20%		Discount for a shared pod. Set by Transit X per year. 15% minimum and 30% maximum. Maximum yearly change is one percentage point.
26	SharedPodRate	0.85	K IDR/km	Rate for a shared pod: BaseRate x (1 - SharedPodDiscount)
27	SharedCompartmentDiscount	40%		Discount for shared compartment. Set by Transit X per year. 25% minimum and 40% maximum. Maximum yearly change is one percentage point.
28	SharedCompartmentRate	0.64	K IDR/km	Rate for shared compartment  BaseRate x (1 - SharedCompartmentDiscount)
29		0.72	K IDR/km	Rate for 500 km in single–passenger pod.
30	Senior + SharedCompartmentRate	0.31	K IDR/km	Rate for a Senior taking a 500 km trip in a shared compartment.  BaseRate x (1 - SeniorDiscountAmount) x (1 - SharedCompartmentDiscount) x (1 - MaxDistanceDiscount)
31	DistanceBase	5,926,183,302	km	Passenger distance under base fare. Audited value from operational data.
32	PercentBase	74%		Percent of passenger distance under base fare:  DistanceBase / PassengerTravel
33	BaseRevenue	4,642,303,446	K IDR	Annual revenue from all travel under base rate. Audited value from operational data.
34	AverageDiscount	26%		Average fare discount from Base Rate: 1 - (BaseRevenue / (DIstanceDase x BaseRate))
35	MarketFactor	1.0		Market rate factor. Negotiated value for setting ratio of AverageDiscount
36	MarketRateCap	26%		Cap on passenger travel distance at market rate:  AverageDiscount x MarketFactor
37	MarketTravelCap	1,568,581,969	km	Cap on passenger travel distance at market rate:  DistanceBase x MarketRateCap

## **Project Summary**

Project Solar-powered automated

**Description** transportation network infrastructure

Project type Privately-funded Green Infrastructure

Project cost \$714 million

Cost to Gov't \$0

Structure Privately financed equity and debt

Debt term 10 years @ 5%

**Equity terms** A waterfall profit distribution with:

1. 90/10 split until Return of Capital,

2. then 50/50 until Target IRR met

3. then 10/90 onwards

Yearly fees & taxes \$38,210,886

Benefits to society and environment

Extremely high

## **Financials**

(US\$ in millions)

	Year 1	Total Years 1-12
Gross Revenues	274	6,675
Taxes and fees	14	334
Debt service	\$65	\$647

## ESG (Environmental, Social, Governance) Benefits

Clean energy	yes	Resiliency	yes
Energy security	yes	Sustainable	yes
Emissions-free	yes	Equitable	yes
GHG-free	yes	Recyclable materials	yes
Lowers pollution	yes	Affordable housing	yes
Clean water	yes	Improved Health	yes
Improved Safety	yes	Econ. Development	yes
New infrastructure	yes	Access to Food	yes
Equitable transport	yes	New job creation	yes

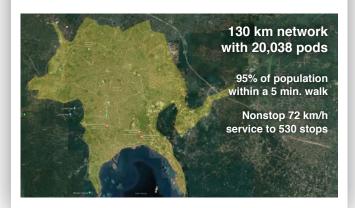

Transit X, LLC presents a preliminary proposal for a privately-funded fleet of fully-autonomous shared electric vehicles on local and regional podway network for

## Bandar Lampung, Indonesia

High capacity • High speed • Nonstop • 24/7
Solar powered • Wait-free • Door-to-door • Resilient

26-page companion Transit X Handbook is available at transitx.com/transitxhandbook.pdf

#### **About Transit X**

Transit X designs, builds, and operates solar-electric shared mobility infrastructure to supplant buses, trains, cars, and trucks. Transit X offers its service to municipalities and commercial developers. First pilots will begin operations by 2019. Transit X is a privately held company founded in 2015, based in Boston, Mass, and intends to be certified as a public benefit company.
