

Transit X, LLC presents a preliminary proposal for
a privately-funded fleet of fully-autonomous shared electric vehicle network for

Bontang, East Kalimantan, Indonesia

**High capacity • High speed • Nonstop • 24/7
Solar powered • Wait-free • Door-to-door • Resilient**

26-page companion Transit X Handbook is available at transitx.com/transitxhandbook.pdf

**217 km network
with 3,226 pods**

**95% of population
within a 10 min. walk**

**Nonstop 72 km/h
service to 220 stops**

Transit X proposes to build and operate a privately-financed pod network to carry passengers and freight for Bontang, East Kalimantan, Indonesia that makes the Transit X service convenient to 95% of the population.

Transit X efficiently services both suburbs and cities and provides for a higher quality of life. See transitx.com for more details. This 3-minute video (transitx.com/video) describes our innovative solution.

Major benefits

- Reduce congestion
- Provide parking relief
- Reduce pollution
- Improve safety

The Transit X Handbook (transitx.com/transitxhandbook.pdf) answers many questions about our service, the company, our technology, and the way we address: congestion, parking, road safety, pedestrian safety, ADA compliance, sustainability, fares, solar+storage, construction, aesthetics, operations, economic development, quality of service, security, station footprint, equitability, carbon footprint, transit integration, resiliency, reliability, rights-of-way, and open space.

Congestion, parking, pollution, and safety

Most regions suffer from traffic congestion, limited parking, air pollution, and unsafe roads. Potential solutions are costly, but Transit X can solve these challenges without public funding. Transit X can integrate into the built environment, providing both short term relief and a long term solution.

No public funding

Transit X does not require public funding because our business model appeals to investment banks and private equity firms that provide our project financing. Most of our infrastructure is factory-built, so that installation is fast and not disruptive. We have reduced or eliminated many costs of transportation infrastructure including materials, land, construction, fuel, debt service, and driver costs. By significantly reducing our costs, it makes private financing possible.

Proven technology

Our team and partners have built fully automated systems that are now in operation around the world. Transit X may look unique, but the underlying design is very similar to systems that have been operating for 40 years with an exemplary safety record. An in-depth (1000+ hours) technical assessment and feasibility analysis has been completed by Altran, a global engineering firm with

extensive expertise in automated transit systems. The first pilots of Transit X will be deployed by the end of 2018.

Before any groundbreaking, the system will be safety-certified and fully insured.

Service Quality

Transit X provides on-demand, last-mile service that is superior to cars or buses. An operating agreement will guarantee high levels of availability and reliability. Our use of small vehicles (pods) makes this possible. By reducing car use, Transit X creates walkable and bike-friendly neighborhoods.

Less pollution: Air, Sound, Light, Visual, Water

Transit X offers a much higher quality of life by eliminating many forms of pollution. Pods are quiet and have no emissions. Pods offer less visual impact than the existing roads and vehicles, and utility lines can be hidden within the track. At night, there is no light pollution from headlights or taillights. Water pollution from road runoff is significantly reduced.

Sustainable

Transit X runs on 100% sustainable energy. The energy generated from solar panels on the track and stored within the poles is sufficient in most cases, but sustainable power contracts may be used to buy and sell power to the grid. Transit X makes it possible to reduce the amount of impervious surfaces and increase green space by reducing the need for parking and roads. By replacing cars, Transit X has a negative carbon footprint.

More Transit & Fewer Cars

Transit X provides the convenience and privacy that people value in cars, yet without the negative impacts of personal cars. Transit X combines the best of mass transit and personal transportation modes which will lead to higher use of mass transit and less use of personal vehicles.

De-risking Projects

Transit X is working with large, established firms to provide fixed-price contracts for the engineering, certification, construction, and operations of a Transit X system. These partnerships enable Transit X to de-risk all of the major elements of the project, and provide performance guarantees.

We would work with regional urban planning and construction firms who are familiar with permitting and applicable codes.

Jobs and Workforce Development

Many jobs will be created to build a new transportation infrastructure, and many new types of job will be created as transportation becomes more efficient. Municipalities that first embrace Transit X will be offered the opportunity to have Transit X manufacturing and assembly jobs in their area. The vast majority of the construction jobs will be locally sourced. Preferential hiring would be given to those workers displaced by the transition to automated vehicles.

Revenue Generator

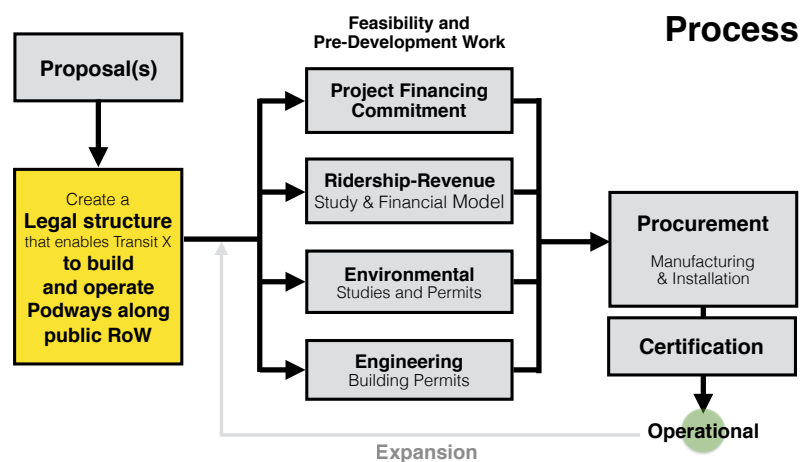

Not only does Transit X not require public financing, but the local municipality and right-of-ways owners receive 5% of gross revenue, which would be US\$9 million per year average over the first 10 years. For specifics, please see the "Taxes and Fees" section of this proposal.

Short and Long Term Solution

A project could be operational within 24 months from the start of a project. Transit X offers a rapidly-deployable solution that provides long term benefits. We would form a local company to build, operate, and maintain the network. At least 75% of the profits would be invested back into the region.

Moving Forward

The diagram shows our general process for working with a municipality or rights-of-way owner. We would refine a proposal to meet your needs, then ask for a letter stating that you would like to move forward with a proposal that includes air rights and an operating agreement. Example documents and a sample project schedule can be viewed at transitx.com/process

Evaluation

Please review our preliminary proposal, and then ask us any questions. We would be happy to provide further information, address specific concerns, or meet with specific people or groups. Any routes or coverage areas shown on the map are only preliminary suggestions and actual routes would be determined based on needs, rights-of-ways, utility corridors, location of trees, and many other factors.

We expect this proposal to be reviewed by one or more committees or working groups. Familiar transportation options, such as buses, light rail, subways, and ride-sharing services (including autonomous vehicles) may have already been considered. Very few options offer the convenience of cars with at least the capacity of buses, and most, if not all, require public funding and subsidies.

Private cars have a dominant mode share because people like the privacy and convenience of a car — despite the significant risks and negative impact associated with them. People won't give up their cars unless the alternative is both better and cheaper. That is what Transit X can provide.

We hope you agree that this proposal offers a way to address your challenges in both the short and long term, providing an option that is better and lower risk than any alternative — including continuing with the status quo.

Whatever process you use to evaluate this proposal, Transit X is open to working with you on refining this proposal to meet your needs. We hope you will conclude that moving forward with Transit X is an excellent opportunity to meet your current and future challenges.

Once we agree to move forward, we need a memorandum of understanding (example at transitx.com/process/mou.html) stating that you intend to pass an ordinance that enables our use of air rights along with an operating agreement.

The buildout of the network would be rolled out in phases, where a first phase could be a 15 to 30 km pilot.

Other Resources

The links below provide general information about Transit X:

- 2 minute video overview (transitx.com/video)
- Transit X Handbook (transitx.com/transitxhandbook.pdf)
- Letters of Project Financing, Due Diligence, Contracts (transitx.com/letters.pdf)
- Example Resolution (transitx.com/process/resolution.html)
- Operating Agreement (transitx.com/process/operating_agreement.html)
- General Q & A (transitx.com/QandA.html)

Addendum

The remaining pages of this proposal provide project-specific details:

- Financial Project Summary with Pro Forma, pages 6-7
- Project Overview, Impact, and Model inputs, pages 8-9
- Taxes and Fees, pages 10-11
- Fares, page 12

We look forward to working with you to improve the quality of life for Bontang through better transportation.

Sincerely,

A handwritten signature in black ink, appearing to read "Mike Stanley", with a stylized, flowing script.

45	Yearly cost of cars displaced — per person	\$6,370	87,390 K IDR
46	Operating costs per passenger-km	\$0.12	
47	Breakeven revenue distance per day	3,122,985 km	
48	Number of tracks in one direction needed to satisfy peak demand	0.01	

Impact of proposed network

1	Reduction in GHG emissions (in metric tons of CO2-eq)	122,884 MTCO2-eq
2	Est. cost to maintain 753 km roadway	\$38,408,464
3	Reduced waste products per year	19,941 metric tons
4	Travel time saved per year	438 hrs/person
5	Cost savings per capita per year from reduced car ownership	\$4,406
6	Increase in household income from time saving and car costs	55%
7	Reported injuries avoided per year	772
8	Lives saved per year	8
9	Land freed from parking (707 acres)	2,862,118 m ²
10	...and its commercial value	\$572,424 per year
11	Health care savings	High
12	Heat island mitigation from replacing asphalt with green space	1 to 3 °C
13	Change in global temperature	TBD °C
14	Decrease in sea level	TBD mm

Model Inputs

15	Ratio of road length to track length	4
16	Walking speed	4.9 km/h
17	Width of convenient swath along track	1.63 km
18	Fixed cost per km. Solar+storage not included.	\$2,790,000
19	Water crossing: additional cost per km	\$8,370,000
20	Triple-speed: additional cost per km	\$5,580,000
21	Average distance traveled per person per year (for trips under 1600 km)	10,000 km
22	Average distance per day per person	27 km
23	Mode share % of people convenient to Transit X	85% at 5 min walk.
24	Percentage of daily demand during peak hour	20%
25	Maximum capacity per track	39,636 pph
26	Average dwell time during peak hour	10 seconds
27	% of pods traveling on route with highest demand	18%
28	Average speed of pod	72 km/h 45 mph
29	Average # of trips for a daily customer	3 per day
30	Average passengers per pod during peak hours	3.7 passengers
31	Average passengers per pod	2.3 passengers
32	Maximum passengers per pod	5 passengers
33	Empty pods: Percentage non-revenue	25%
34	Ex-Factory cost per pod	\$5,000 68,600 K IDR
35	Worldwide Median Income per Household (US\$)	10,000 137,200 K IDR
36	Average number of residents per household	2.3 K IDR
37	Base fare per km	\$0.13 1.8 K IDR
38	(per mile)	\$0.21 2.9 K IDR
39	O&M as % of project cost	5%
40	Percentage debt financed	70%
41	Length of loan/debt	10 years
42	Interest rate for debt	5%
43	kg CO2 emissions per liter of gasoline	2.37
44	Monetary value of 1 hour personal time (USD)	2.5 34 K IDR
45	Eat. roadway maintenance per year per km	\$51,000 699,720 K IDR
46	Area of one parking lot space	23 m ²
47	Commercial income of land	\$0 per m ² K IDR
48	Distance from roadway that is convenient	0.49 km
49	Stops per km	1.0
50	Solar panel area per meter of track	2.0
51	Cost of sustainable energy and storage	\$0.15 per kWh
52	Global Horizontal Irradiance (GHI)	3.8 kWh/m ² /day
53	Cost to generate sustainable energy	\$2,000 per kW
54	Energy storage cost	\$800 per kWh
55	Energy storage capacity	1 days
56	Area of parked pod	2.20 m ²

Model Inputs (continued)

56	Name of region or project	Bontang, East Kalim
57	Currency name	K IDR
58	Equal to US\$1	13.720
59	Sustainable energy/electricity generation & storage as	CAPEX
60	Land area of region (sq. km)	497
61	Number of residents in region	175,830
62	% travel within region	90%
63	% of land area served by roads	75%
64	Coverage: % of pop. convenient (10 min walk) to Transit X	95%
65	Median household income (US\$)	10,000
66	Convenient walk time to stop (min)	10
67	Triple-speed route length (km)	0
68	Water crossing route length (km)	0.0
69	Visitors per year	0
70	Average length of visit (days)	2
71	Solar production ratio	1.57
72	Regional Fare Factor	1.5
73	EPC costs & contingency	30%
74	Triple-speed (km/h)	242

Pod & Car

	Pod	Car
Service life (years)	20	12
Full cost of vehicle per year	\$200	\$9,000
Public cost to maintain infrastructure (per km)	\$0	\$100,000
Energy Efficiency in MPGe	1188	24
Energy Efficiency in liters/100km	0.20	9.8
Energy used (Watt-hours/km)	28	1375
mass of CO2 per vehicle per km (kg)	0	0.09875
Vehicle mass (kg)	45	1950
Average speed of urban travel (km/h)	72	16
Typical travel time (in minutes) for 8 km trip	7	31

Number of deaths per 100M passenger-km	0.00001	1
Number of injuries per 100M passenger-km	0.0006	62
Volume to park (cubic meters)	5.7	70.9

4% of gross revenue proportioned to air rights owners and a municipal fee/tax of 1% of gross revenue. Both air rights and fee/tax have a minimum payment based on the Footprint and the Transit X Commercial Rate (TXCR).

1 Municipal rates

2	Total commercial land (estimated)	37,275,000 m ²	
3	Total commercial muni revenue (US\$)	\$7,455,000	102,282,600 K IDR
4	TXCR (Transit X Commercial Rate)	\$0.20 per m ²	2.7 K IDR

*TXCR is the yearly tax rate per land area.
Calculation: total land area of commercial properties in the municipality, divided by all the municipal income generated by those properties.
The TXCR is used to calculate the minimum tax/fee.*

6 Project Revenue

7	Length of Transit X route	217 km	
8	Estimated gross revenue per unit length	\$1,201,412 per km	16,483,377 K IDR

9

10 Municipal Tax % of gross revenue with minimum.

11	1% gross revenue	\$12,014 per route-km	164,834 K IDR
12	Minimum per year	\$330 per route-km	

13 Air Rights Leasing Fee % of gross revenue with minimum. Proportioned based on length.

14	% of route on municipal land	90%	
15	4% gross revenue	\$48,056 per route-km	659,335 K IDR
16	Minimum per year	\$330 per route-km	

17 Taxes, Fees, Programs

18	Paid to Municipality	\$11,981,642 per year	164,388,126 K IDR
19	...with minimum	\$136,135	
20	Paid to Private land owners	\$1,041,882 if 10% of RoW is over private property	
21	...with minimum	\$7,165	
22	For livelihood programs	\$0	

Footprint calculations for minimum fee

36	% gross revenue for air rights (RoW)	4%	
37	% gross revenue for RoW+tax+fee	5%	
38	Impediment Factor	5	

Fair Fares

Fares will be similar to existing mass transit, and several times less than taxis or ride-sharing services. Transit X Fair Fare is a universal passenger fare model that applies to all regions and all times. Fares are proportional to the median income of the area and inversely proportional to per capita use, so the more use of Transit X, the lower the base fare. Market-rate fares are proportional to number of half-price fares. No additional peak or congestion pricing. Longer trips are discounted: 0% at 0 km, and up to a 40% discount at 500 km or greater trip length, below 500 km, discount is proportional to trip length.

		0% of use	80% of use	+25% Income	71% of use	50% market fares
1	Median household income	US\$ 10,000	\$10,000	\$12,500	\$10,000	\$10,000

28	Average expected fare discount	18%
29	Percentage of revenue from freight and advertising	40%
30	Metric ton per km (US\$)	\$0.13
31	Regional Fare Factor	1.50

Project Summary

Project Description	Solar-powered automated transportation network infrastructure
Project type	Project financing of Green Infrastructure
Project cost	\$875 million
Structure	Equity and Debt
Debt term	10 years @ 5%
Equity terms	A waterfall profit distribution of: <ol style="list-style-type: none"> 1. 90/10 split until Return of Capital, 2. then 50/50 until Target IRR met 3. then 10/90 onwards
Benefits to society and environment	Extremely high

Financials

(US\$ in millions)

	Year 1	Total Years 1-12
Gross Revenues	87	2,113
Taxes and fees	4	106
Debt service	\$79	\$793

ESG (Environmental, Social, Governance) Benefits

Clean energy	yes	Resiliency	yes
Energy security	yes	Sustainable	yes
Emissions-free	yes	Equitable	yes
GHG-free	yes	Recyclable mat.	yes
Lowers pollution	yes	Affordable housing	yes
Clean water	yes	Improved Health	yes
Improved Safety	yes	Economic Devel.	yes
Fixe Infrastructure	yes	Food security	yes

Transit X, LLC presents a preliminary proposal for a privately-funded fleet of fully-autonomous shared electric vehicle network for

Bontang, East Kalimantan, Indonesia

High capacity • High speed • Nonstop • 24/7
Solar powered • Wait-free • Door-to-door • Resilient

26-page companion Transit X Handbook is available at transitx.com/transitxhandbook.pdf

217 km network with 3,226 pods

95% of population within a 10 min. walk

Nonstop 72 km/h service to 220 stops

About Transit X

Transit X designs, builds, and operates solar-electric shared mobility infrastructure to supplant buses, trains, cars, and trucks. Transit X offers its service to municipalities and commercial developers. First pilots will begin operations by 2019. Transit X is a privately held company founded in 2015, based in Boston, Mass, and intends to be certified as a public benefit company.

Status

12-year Pro Forma

Model Inputs and Assumptions

Route length (km)	217	Travel per year per pod (km)	168,170
Starting number of pods	1,075	Revenue per vehicle-km (US\$)	0.48
Projected revenue growth	15%	OPEX as % of project cost	5%
Project Cost	\$875,211,080	Debt Interest rate	5%
% Debt financed	70%	Debt term (yrs)	10
Debt	\$612,647,756	Years to return equity capital	5
Equity	\$262,563,324	Profit share when below capital return	90%
Capital return per year	\$52,512,665	Profit share when below Target IRR	50%
Debt payment (per year)	\$79,340,687	Profit share when above Target IRR	10%

The revenue estimates are conservative because they only show revenue from passenger fares, freight, and advertising, which may be less than 60% of total revenue. A substantial revenue stream can be expected from developer fees, private leasing, private branch & stops, subsidies, municipal contracts, carbon credits, water delivery, conduit leasing, 3rd-party services, mail & package delivery, para-transit, private shuttles, sale of surplus power to grid, and naming rights.
