

Transit X presents a preliminary proposal for a privately-financed public transit system — a fleet of automated electric vehicles (pods) for passengers and freight on a local and inter-city micro-guideway providing equitable transportation for

Jonesboro, GA

This proposal is downloadable at transitx.com/proposals/Transit X for Jonesboro,GA.pdf

High capacity • High speed • Nonstop • 24/7 Sustainable • Zero Wait • Door-to-door • Resilient

A companion Transit X Handbook is available at transitx.com/transitxhandbook.pdf

Transit X proposes to finance, build and operate a sustainable microguideway to carry passengers and freight for Jonesboro that makes a podway convenient to 95% of the population.

Transit X efficiently services both suburbs and cities and provides for a higher quality of life. See transitx.com for more details. This 3-minute video (transitx.com/video) describes our innovative solution.

Major benefits

- Reduce congestion
- · Provide parking relief
- Reduce pollution
- Improve safety

The Transit X Handbook (transitx.com/ transitxhandbook.pdf) answers many questions about our service, the company, our technology, and the way we address: congestion, parking, road safety, pedestrian safety, accessibility, sustainability, fares,

renewable energy & storage, construction, aesthetics, operations, economic development, quality of service, security, station footprint, equitability, carbon footprint, transit integration, resiliency, reliability, rights-of-way, and open space.

Congestion, parking, pollution, and safety

Most regions suffer from traffic congestion, limited parking, air pollution, and unsafe roads. Potential solutions are costly, but Transit X can solve these challenges without public funding. The Transit X podway can integrate into the built environment, providing both short term relief and a long term solution.

High Capacity & High Speed

A single guideway carries 12,000 pods per hour (20,000 to 50,000 passengers per hour). Two landing areas fit in a single car space and provide 2,000 boardings per hour. For urban commutes, pods trips are 3 times faster than car trips and the high-speed podway provides faster door-to-door trips than air travel for distances of 1,000 miles or less.

Zero Footprint and Minimal Disruption

Transit X features stops that don't interfere with pedestrians or other forms of transportation. We use space alongside highway and roads and integrate utility lines and poles. Non-stop interchanges fit above existing intersections. Factory-built infrastructure enables fast installation with minimal disruption. Multiple options for long crossings using bridges or underground tunnels. Posts are typically spaced at 23 m (25 yds). Multiple options for pods to traverse any grade or slope.

Low-cost Infrastructure & equitable fares

Transit X projects do not require government funding because revenue from fares, freight, and advertising is much higher than our costs. We have reduced or eliminated many costs of transportation including the cost of materials, land, construction, fuel, debt service, and labor. Our projects are typically financed by impact investors, private wealth funds, commercial banks, sovereign wealth funds, and governments.

Proven technology

Our team and partners have built fully automated systems that are now in operation around the world. Transit X may look unique, but the underlying design is very similar to systems that have been operating for 40 years with an exemplary safety record. The rollout and maiden flight occurred on Oct 29, 2018 in Leominster, Massachusetts. The first project groundbreaking will be in 2020.

Service Quality

Transit X provides on-demand, last-mile service that is superior to cars or buses. An operating agreement will guarantee high levels of availability and reliability. Our use of small vehicles (pods) makes this possible. By reducing car use, podways create walkable and bike-friendly neighborhoods.

Less pollution: Air, Sound, Light, Visual, Water

Transit X podways offer a much higher quality of life by eliminating many forms of pollution. Pods are quiet, efficient and have zero emissions. Pods offer less visual impact than the existing roads and vehicles, and utility lines can be hidden within the guideway. At night, there is no light pollution from headlights or taillights. Water pollution from road runoff is significantly reduced. Parking lots and roadways can be converted into green space and community paths as they become unnecessary.

Sustainable and Efficient

Pods weigh only 55 kg (121 lbs) and achieve over 20 times the efficiency of electric cars. Renewable energy and storage installed on our guideways and posts provide 100% of the clean energy needed to power the system.

More Transit & Fewer Cars

Podways provides the convenience and privacy that people value in cars, yet without their negative impacts. Transit X combines the best of mass transit and personal transportation modes which leads to greater use of public transit and fewer cars.

De-risking Projects

Transit X partners with large, established firms to provide fixed-price contracts for the engineering, certification, construction, and operations of a podway. These partnerships enable Transit X to de-risk all of the major elements of the project, and provide performance guarantees. We work with local construction firms.

Jobs and Workforce Development

Many regional jobs will be created to build a new transportation infrastructure, as well many new types of jobs will be created from economic growth. The majority of the construction jobs will be locally sourced and preferential hiring is given to those displaced by the transition. We welcome labor unions.

Revenue Generator

Projects do not require government funding, and owners of the rights-of-way receive a Toll Share that is 5% of gross revenue for rights-of-way, estimated to be US\$0 million per year at the revenue target.

Short and Long Term Solution

A project could be operational within 24 months from the start of a project. Transit X offers a rapidly-deployable solution that provides long term benefits. We would form a local company to build, operate, and maintain the network. At least 75% of the profits are re-invested in the community and region.

Moving Forward

The diagram shows our process for a project. We submit a project proposal, then ask for a commitment for Transit X to build and operate a podway along rights-of-way. Example documents and a sample project schedule can be viewed at:

transitx.com/process

Evaluation

Please review our

preliminary proposal, and then ask us any questions. We would be happy to provide further information, address specific concerns, or meet with specific people or groups. Any routes or coverage areas shown on the map are only preliminary suggestions and actual routes would be determined based on needs, rights-of-ways, utility corridors, location of trees, and many other factors.

We expect this proposal to be reviewed by one or more committees or working groups. Familiar transportation options, such as buses, light rail, subways, and ridesharing services (including autonomous vehicles) may have already been considered. Very few options offer the convenience of cars with at least the capacity of buses, and most, if not all, require public funding and subsidies.

Private cars have a dominant mode share because people like the privacy and convenience of a car — despite the significant risks and negative impact associated with them. People won't give up their cars unless the alternative is both better and cheaper. That is what Transit X can provide.

We hope you agree that this proposal offers a way to address your challenges in both the short and long term, providing an option that is better and lower risk than any alternative — including continuing with the status quo.

We hope you will conclude that moving forward with Transit X is an excellent opportunity to meet your current and future challenges.

We look to a commitment enabling Transit X to build and operate podways along public rights-of-way, similar to other public utilities.

Impact of proposed network

Project Overview p. 2

Estimated cost to maintain public roadways Reduced waste products	\$3,005,357 annually
³ Reduced waste products	40=
	435 metric tons annually
Travel time saved (non-stop travel and congestion)	340 hrs/person annually
⁵ Cost savings from reduced car ownership	\$1,500 per person annually
6 Increase in household income (from time savings and car costs)	11%
7 Reported injuries avoided	17 annually
8 Lives saved (from safety)	0 annually
⁹ Land freed from parking (15 acres)	62,401 m ²
Temperature reduction (from heat island effect & GHG reductions)	0.5 to 2 °C
Health care savings (from pollution, injuries)	High

Inputs and Assumptions

			inputs	and As
15	Ratio of road length to guideway length	4		
16	Walking speed		km/h	3 mph
17	Width of convenient swath along podway	0.65	km	0 mile
18	Fixed cost per km (track & posts)	\$2,790,000		
19	Water crossing: additional cost per km	\$8,370,000		
20	Triple-speed: additional cost per km	\$5,580,000		
21	Rate factor for water crossings or high-speed links.	2.2		
22	Average distance traveled per person per year in a developed county for trips under 1600 km)	10,000		6,211 miles
23	Average distance per day per person		km	
24	Mode share % of people convenient to a podway		at 5 min walk.	
25	Percentage of daily demand during peak hour	20%		
26	Maximum capacity per guideway	23,598		
27	Average dwell time during peak hour		seconds	
28	% of pods traveling on route with highest demand	18%	1 11:	45
29	Average speed of pod		km/h	45 mph
30	Average # of trips for a daily customer		per day	
31	Average passengers per pod during peak hours		passengers	
32	Average passengers per pod	1.4	passengers	
	Average discount per passenger		200002000	
33	Maximum passengers per pod	25%	passengers	
34	Empty pods: Percentage non-revenue			
35	Ex-Factory cost per pod Worldwide Median Income per Household (US\$)	\$5,000 \$10,000		
36			people/house	
37	Average number of residents per household	\$0.41	people/flouse	
38	Base fare per km (per mile)	\$0.41		
00	Market rate revenue factor	2.1		
40	Percentage of revenue from passenger fares	60%		
40	O&M as % of revenue	20%		
41	Percentage debt financed	70%	deht	
41	Interest rate for debt		interest	
43	kg CO2 emissions per liter of gasoline		kg/liter	
44	Monetary value of 1 hour personal time (USD)	\$13.75	ngo.	
45	Est. roadway maintenance per year per km	\$100,000		
46	Area of one parking lot space		m²	247 sf
47	Commercial income of land (annual)		per m ²	
48	Distance from roadway that is convenient	0.20	•	
49	Stops per km	5	stops/km

Toll Share for Rights-of-Way

Rights-of-Way owners' Toll Share is 5% of gross revenue

with a minimum payment based on the Footprint and the Transit X Commercial Rate (TXCR).

7 Toll Share Payment (inclusive of all fees and taxes)

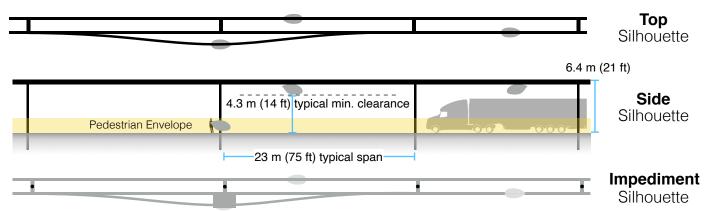

8	Estimated Annual Payment at target revenue	\$464,517 annually	\$98 per resident			
9	with a minimum of	\$18,673 annually				
10						
11	Other financial benefits to Owners of Rights-of-way and/or Local Government:					
12	Less road maintenance from lower VMT					
13	Public land made available from less parking and lanes					
14	Reduced emergency and police services for road-related incidents					
15	Less investment needed in road-base	d infrastructure				

1 Minimum payment calculations

(charging stations, signals, BRT, etc)

2	Total commercial land (estimated)	595,000 m ²	147 acres
3	Total commercial gov't revenue (US\$)	\$654,500	
4	TXCR (Transit X Commercial Rate)	\$1.10 per m ² (estimated)	
5	TXCR is the yearly tax rate per land area. Calculation: total land area of commercial properties in the governmental region, divided by all the governmental income generated by those properties. The TXCR is used to calculate the minimum tax/fee.	\$11.84 per sf (estimated)	

Toll Share Minimum Calculation

Fair Fare Formula

Summary

Faster travel saves a household 295 hours per year.*

At 0.39 per mile, a typical commute on Transit X is 17% less than public transit

Trip I	Length
--------	--------

			1 3	
All prices in USD Transit X Public transit average		1.2 mile	6 mile	25 mile
		0.49 to 0.81 2 min., 3.6x faster	2.40 to 4.03 8 min., 3.6x faster	9.22 to 15.71 33 min., 3.4x faster
		2.72	4.33	6.35
səpou	Taxi	3.77 2 to 6 minutes	16.43 8 to 30 minutes	63.91 30 to 120 minutes
ublic n	Uber/Lyft	2.87 2 to 6 minutes	11.83 8 to 30 minutes	45.43 30 to 120 minutes
Common public modes	Public Bus	2.19 3 to 12 minutes	2.19 15 to 60 minutes	3.36 60 to 240 minutes
Comr	Train	3.29 2 to 12 minutes	3.87 8 to 60 minutes	6.06 30 to 240 minutes
Personal car		3.15 2 to 6 minutes	9.91 8 to 30 minutes	35.26 30 to 120 minutes

										М	ode shar	е

^{*} All numbers on mode shares, speeds, and costs are estimates based on global averages.

Base fares are set for first 3 years, then adjusted by formula. A 20% discount on a shared pod and a 40% discount on a shared compartment. Trips are discounted proportional to their length reaching a maximum of a 40% discount on a 500 km trip. No congestion—based pricing. Fares are proportional to the median income of the area and inversely proportional to per capita use, so the more use of Transit X, the lower the base fare up a to 50% discount. The amount of market—rate fares must be less than the amount of discounted fares. Transit X Fair Fare Formula and Fair Freight Formula is universal and applies to all regions and all times. Market rate fares must account for less than half of all fares.

Fair Fare Formula

Fare rates are updated annually using this formula

	Name	Value	Units	Description of the value or model input
1	GlobalIncome	10,000	USD	Global median household income. Updated annually based on most recent standard published data.
2	AllTravel	20,000	km	Travel distance per household per year on any mode for trips under 1600 km. A global constant
3	PercentIncomeForTra nsport	25%		% of median household income for all transportation under 1600 km trips. A global constant.
4	GlobalRate	0.13	USD/km	Global minimum rate: GlobalIncome * PercentIncomeForTransport / AllTravel
5	IncomeFirst	\$55,000	USD	Median household income at first stop (per person per day). External input. Based on reliable public data source updated annually. Maximum is 8 times GlobalIncome
6	IncomeDest	80,000	USD	Median household income at destination per trip. External input. Based on reliable public data updated annually. Maximum is 8 times GlobalIncome
7	RegionalRate	0.69	USD/km	Regional rate based on median income: MedianIncomeFirst * PercentIncomeForTransport / AllTravel
8	UnderIncomeRate	0.00	USD/km	Under global income adjustment: if (RegionalRate < GlobalRate, GlobalRate - RegionalRate, 0)
9	NominalRate	0.69	USD/km	Nominal rate: RegionalRate + UnderIncomeRate
10	RegionalFactor	1.00		Regional Fare Factor. Negotiated upfront to make network financially viable.
11	AdjustedRate	0.69	USD/km	Regional adjusted rate: NominalRate * RegionalFactor
12	Population	<u>4,729</u>		Population in region. Updated annually based on trusted public data source.
13	UsageMaxDiscount	50%		Fare Discount when Transit X travel per household equals AllTravel. Global constant.
14	ModeShare	82%		Percent of Total Travel Per Capita on Transit X podways. Based on target mode share for first 3 years, then adjusted based on actual travel. PassengerTravel / (Population x AllTravel)
15	BaseRate	0.41	USD/km	Base rate for single-passenger pod (without discounts) (1 - UsageMaxDiscount x min(1,ModeShare)) x AdjustedRate
16	SpecialRateFactor	2.20		Rate factor for water crossings or high-speed links. Global constant.
17	SpecialBaseRate	0.89	USD/km	Base rate for high-speed travel or water crossings: BaseRate * SpecialRateFactor
18	DistanceDiscount	40%		Distance discount at max distance. Global constant.
19	MaxDistanceDiscount	500	km	Max distance discount. Global constant.
20	DistanceDiscountPer Km	0.000325	USD/km	Discount amount per km: BaseRate x DistanceDiscount / MaxDistanceDiscount
21	SeniorDiscount	20%		Senior discount set according to local regulations
22	StudentDiscount	20%		Student discount set according to local regulations
23	DisabilityDiscount	20%		Disability discount set according to local regulations
24	DiscountBaseRate	0.32	USD/km	Discounted base rate: BaseRate x (1 - SeniorDiscount)
25	SharedPodDiscount	20%		Discount for requesting a shared pod. 15% minimum and 30% maximum.
26	SharedPodRate	0.32	USD/km	
27	SharedCompartment Discount	40%	OSD/KIII	Rate for a shared pod: BaseRate x (1 - SharedPodDiscount) Discount for requesting a shared compartment. 25% minimum and 40% maximum. At least 10 percentage points higher than SharedPodDiscount.
28	SharedCompartment Rate	0.24	USD/km	Rate for shared compartment BaseRate x (1 - SharedCompartmentDiscount)
29	SingleOccupancyMax Distance	0.28	USD/km	Rate for 500 km in single–passenger pod.
30	Senior + SharedCompartment Rate	0.12	USD/km	Rate for a Senior taking a 500 km trip in a shared compartment. BaseRate x (1 - SeniorDiscountAmount) x (1 - SharedCompartmentDiscount) x (1 - MaxDistanceDiscount)
31	50PctIncomeAtDest	23%		% Higher fare rate if Destination has 50% higher median income than First (IncomeDest / IncomeFirst - 1) / 2
32	DistanceBase	-	km	Passenger distance under base fare.
33	PercentBase	<u>74%</u>		Percent of passenger distance under base fare. Audited value from operational data. DistanceBase / PassengerTravel
34	AverageDiscount	18%		Average fare discount from Base Rate. Audited value from operational data. 1 - (BaseRevenue / (DistanceDase x BaseRate))
35	MarketFactor	1.0		Market rate factor. Negotiated value for setting ratio of AverageDiscount
36	MarketRateCap	18%		Cap on passenger travel distance at market rate: AverageDiscount x MarketFactor

Jobs Report*

This project would create 200 new jobs in manufacturing, construction, and operations. About 100 existing transportation jobs would be impacted — of which 0 workers would need significant retraining. Improving the transportation infrastructure will boost the economy overall and lead to 0 new jobs. Lowering the cost of transportation and reducing travel times raises household income by 11%.

1	Annual median household income (US\$)	\$55,000	
2	CAPEX		
3	Average gross CAPEX salary (% of median HH)	125%	
4	Average gross CAPEX salary	\$68,750	
5	% of CAPEX as salary	15%	
6	Years of CAPEX	2	
7	# of CAPEX jobs	40
