

Transit X presents a preliminary proposal for a sustainable micro-rail network a fleet of automated electric vehicles (pods) for passengers and freight on a local and regional podway providing equitable public transportation for

# Paulding County, GA

This proposal is downloadable at transitx.com/proposals/Transit X for Paulding County,GA.pdf

## High capacity · High speed · Nonstop · 24/7 Solar powered · Zero Wait · Door-to-door · Resilient

A 24-page companion Transit X Handbook is available at transitx.com/transitxhandbook.pdf

## 58 mile network with 1,462 pods

75% of population within a 10 min. walk

Nonstop 45 mph service to 190 stops

Page 1

### Transit X proposes to build and operate a sustainable micro-rail podway to carry passengers and freight for Paulding County that makes the Transit X service convenient to 75% of the population.

Transit X efficiently services both suburbs and cities and provides for a higher quality of life. See transitx.com for more details. This 3-minute video (transitx.com/ video) describes our innovative solution.

### **Major benefits**

- · Reduce congestion
- · Provide parking relief
- Reduce pollution
- · Improve safety

The Transit X Handbook (<u>transitx.com/</u> <u>transitxhandbook.pdf</u>) answers many questions about our service, the company, our technology, and the way we address: congestion, parking, road safety, pedestrian safety, ADA compliance, sustainability, fares,

solar+storage, construction, aesthetics, operations, economic development, quality of service, security, station footprint, equitability, carbon footprint, transit integration, resiliency, reliability, rights-of-way, and open space.

### Congestion, parking, pollution, and safety

Most regions suffer from traffic congestion, limited parking, air pollution, and unsafe roads. Potential solutions are costly, but Transit X can solve these challenges without public funding. Transit X can integrate into the built environment, providing both short term relief and a long term solution.

### **High Capacity**

A single track carries 12,000 pods per hour (20,000 to 50,000 passengers per hour). Two boarding areas fit in a single car space and provide 2,000 boardings per hour.

### Zero Footprint and Minimal Disruption

Transit X features stops that don't interfere with pedestrians or other forms of transportation. We use easements alongside highway and roads and integrate utility lines and poles Non-stop interchanges fit above existing intersections. Factory-built tracks and posts enable fast installation with minimal disruption. There are options for long crossings using bridges or underground tunnels. Posts are typically spaced at 23 m (25 yds).

### Low-cost Infrastructure & equitable fares

Transit X does not require government funding because our revenue from fares, freight, and advertising is greater than our costs. We have reduced or eliminated many costs of transportation including the cost of materials, land, construction, fuel,

debt service, and labor. Our projects are typically financed by investment banks, private equity firms, banks, and governments.

### **Proven technology**

Our team and partners have built fully automated systems that are now in operation around the world. Transit X may look unique, but the underlying design is very similar to systems that have been operating for 40 years with an exemplary safety record. The rollout and maiden flight occurred on Oct 29, 2018 in Leominster, Massachusetts. The first Transit X system will be demonstrated by the end of 2019.

### **Service Quality**

Transit X provides on-demand, last-mile service that is superior to cars or buses. An operating agreement will guarantee high levels of availability and reliability. Our use of small vehicles (pods) makes this possible. By reducing car use, Transit X creates walkable and bike-friendly neighborhoods.

### Less pollution: Air, Sound, Light, Visual, Water

Transit X offers a much higher quality of life by eliminating many forms of pollution. Pods are quiet, efficient and have zero emissions. Pods offer less visual impact than the existing roads and vehicles, and utility lines can be hidden within the track. At night, there is no light pollution from headlights or taillights. Water pollution from road runoff is significantly reduced. Parking lots and roadways can be converted into green space and community paths as they become unnecessary.

### Sustainable and Efficient

Pods weigh only 45 kg (100 lbs) and achieve over 20 times the efficiency of electric cars. Solar, wind, and storage installed on our tracks and posts can provide 100% of the clean energy needed to power the system.

### More Transit & Fewer Cars

Transit X provides the convenience and privacy that people value in cars, yet without the negative impacts of personal cars. Transit X combines the best of mass transit and personal transportation modes which will lead to greater use of public transit and fewer cars.

### **De-risking Projects**

Transit X partners with large, established firms to provide fixed-price contracts for the engineering, certification, construction, and operations of a Transit X system. Theses partnerships enable Transit X to de-risk all of the major elements of the project, and provide performance guarantees. We work with local construction firms.

### Jobs and Workforce Development

Many regional jobs will be created to build a new transportation infrastructure, as well many new types of jobs will be created from economic growth. The majority of the construction jobs will be locally sourced and preferential hiring is given to those displaced by the transition.

### **Revenue Generator for Government**

Not only does Transit X not require public financing, but the government and private easement owners receive 4-5% of gross revenue, which would be US\$9 million per year average over the first 10 years.

### Short and Long Term Solution

A project could be operational within 24 months from the start of a project. Transit X offers a rapidly-deployable solution that provides long term benefits. We would form a local company to build, operate, and maintain the network. At least 75% of the profits would be invested back into the region.

### Moving Forward

The diagram shows our process for a project. We submit a project proposal, then ask for a commitment for Transit X to build and operate a podway along rights-of-way easements. Example documents and a sample project schedule can be viewed at: transitx.com/process

### Evaluation

#### Please review our

preliminary proposal, and then ask us any questions. We would be happy to provide further information, address specific concerns, or meet with specific people or groups. Any routes or coverage areas shown on the map are only preliminary suggestions and actual routes would be determined based on needs, rights-of-ways, utility corridors, location of trees, and many other factors.

We expect this proposal to be reviewed by one or more committees or working groups. Familiar transportation options, such as buses, light rail, subways, and ridesharing services (including autonomous vehicles) may have already been considered. Very few options offer the convenience of cars with at least the capacity of buses, and most, if not all, require public funding and subsidies.

Private cars have a dominant mode share because people like the privacy and convenience of a car — despite the significant risks and negative impact associated with them. People won't give up their cars unless the alternative is both better and cheaper. That is what Transit X can provide.

We hope you agree that this proposal offers a way to address your challenges in both the short and long term, providing an option that is better and lower risk than any alternative — including continuing with the status quo.

We hope you will conclude that moving forward with Transit X is an excellent opportunity to meet your current and future challenges.

Once we agree to move forward, we look to receive a commitment for Transit X to build and operate a podway along rights-of-way easements.

A podway network is rolled out in phases that each take less than 24 months.

### **Other Resources**

The links below provide general information about Transit X:

- One minute video overview (transitx.com/video)
- Transit X Handbook (transitx.com/transitxhandbook.pdf)
- · Letters of Project Financing, Due Diligence, Contracts (transitx.com/letters.pdf)
- Memorandum of Understanding template (transitx.com/process/mou.html)
- Example Right-of-Way agreement (transitx.com/process/resolution.html)
- Operating Agreement (transitx.com/process/operating\_agreement.html)
- · General Q & A (transitx.com/QandA.html)
- Other proposals (transitx.com/proposals)

### Addendum

The remaining pages of this proposal provide project-specific details:

- Project Overview and Impact pages 6 and 7
- Taxes and Fees pages 8 and 9
- Fares page 10 and 11
- Financial Project Summary with Pro Forma pages 12 and 13

We look forward to working with you to improve the quality of life for Paulding County through better transportation.

Sincerely,

### Project Overview p. 2

### Impact of proposed network

| 1  | Reduction in GHG emissions (metric tons CO2-eq)                  |
|----|--|
| 2  | Estimated cost to maintain public roadways                       |
| 3  | Reduced waste products   |
| 4  | Travel time saved (non-stop travel and congestion)               |
| 5  | Cost savings from reduced car ownership                          |
| 6  | Increase in household income (from time savings and car costs)   |
| 7  | Reported injuries avoided  |
| 8  | Lives saved (from safety)  |
| 9  | Land freed from parking (191 acres)                              |
| 12 | Temperature reduction (from heat island effect & GHG reductions) |
| 11 | Health care savings (from pollution, injuries)                   |

### **Model Inputs**

| 15 | Ratio of road length to track length                 | 4           |                    |             |
|----|--|-------------|--------------------|-------------|
| 16 | Walking speed  | 4.9         | km/h               | 3 mph       |
| 17 | Width of convenient swath along track                | 1.63        |                    | 1 mile      |
| 18 | Fixed cost per km (track & posts)                    | \$2,790,000 |                    |             |
| 19 | Water crossing: additional cost per km               | \$8,370,000 |                    |             |
| 20 | Triple-speed: additional cost per km                 | \$5,580,000 |                    |             |
| 21 | Rate factor for water crossings or high-speed links. | 2.2         |                    |             |
|    | Average distance traveled per person per year        | 10.000      |                    |             |
| 22 | (for trips under 1600 km)                            | 10,000      | km                 | 6,211 miles |
| 23 | Average distance per day per person                  | 27          | km                 |             |
| 24 | Mode share % of people convenient to Transit X       | 85%         | at 5 min walk.     |             |
| 25 | Percentage of daily demand during peak hour          | 20%         |                    |             |
| 26 | Maximum capacity per track                           | 23,598      | pph                |             |
| 27 | Average dwell time during peak hour                  | 10          | seconds            |             |
| 28 | % of pods traveling on route with highest demand     | 18%         |                    |             |
| 29 | Average speed of pod                                 | 72          | km/h               | 45 mph      |
| 30 | Average # of trips for a daily customer              | 3           | per day            |             |
| 31 | Average passengers per pod during peak hours         | 2.2         | passengers         |             |
| 32 | Average passengers per pod                           | 1.4         | passengers         |             |
|    | Average discount per passenger                       | 18%         |                    |             |
| 33 | Maximum passengers per pod                           | 5           | passengers         |             |
| 34 | Empty pods: Percentage non-revenue                   | 25%         |                    |             |
| 35 | Ex-Factory cost per pod                              | \$5,000     |                    |             |
| 36 | Worldwide Median Income per Household (US\$)         | 10,000      |                    |             |
| 37 | Average number of residents per household            | 2.3         |                    |             |
| 38 | Base fare per km                                     | \$0.45      |                    |             |
| 39 | (per mile)   | \$0.73      |                    |             |
| 40 | O&M as % of project cost                             | 5%          |                    |             |
| 41 | Percentage debt financed                             | 70%         |                    |             |
| 42 | Length of loan/debt                                  |             | years              |             |
| 43 | Interest rate for debt                               | 7%          |                    |             |
| 44 | kg CO2 emissions per liter of gasoline               | 2.37        |                    |             |
| 45 | Monetary value of 1 hour personal time (USD)         | \$13.75     |                    |             |
| 46 | Eat. roadway maintenance per year per km             | \$51,000    |                    |             |
| 47 | Area of one parking lot space                        |             | m <sup>2</sup>     | 247 sf      |
| 48 | Commercial income of land (annual)                   |             | per m <sup>2</sup> |             |
| 49 | Distance from roadway that is convenient             | 0.49        | km                 |             |

| 100 | Volume to park (cubic meters)                      | 5.7     | 70.9      |
|     |  |         |           |

### **Taxes and Fees**

### 5% of gross revenue is paid for air rights and local taxes.

A minimum payment is based on the Footprint and the Transit X Commercial Rate (TXCR).

| 1  | Air-rights and Local Taxes  |              | (for calculating m                | ninimums)             |
|----|---|--------------|-----------------------------------|-----------------------|
| 2  | Total commercial land (estimated)   | 20,200,000   | m <sup>2</sup>                    | 4,992 acres           |
| 3  | Total commercial gov't revenue (US\$)   | \$22,220,000 |                                   |                       |
| 4  | TXCR (Transit X Commercial Rate)  | \$1.10       | per m <sup>2</sup><br>(estimated) |                       |
| 5  | TXCR is the yearly tax rate per land area. Calculation:<br>total land area of commercial properties in the<br>governmental region, divided by all the governmental<br>income generated by those properties. The TXCR is<br>used to calculate the minimum tax/fee. | \$11.84      | per sf<br>(estimated)             |                       |
| 6  |   |              |                                   |                       |
| 7  | Private Easement Fees   | For exam     | ple                               |                       |
| 8  | 4% of gross revenue   | \$25.67      | per route-meter                   | \$7.83 per route-foot |
| 9  | Minimum per year  | \$1.63       | per route-meter                   | \$0.50 per route-foot |

| 12 | Total air-rights and local taxes  | \$11,712,380 | per year                          |                       |
| 13 | per resident  | \$82         |                                   |                       |

with a minimum of \$151,639 per year

15

14

### <sup>16</sup> Other financial benefits to Government

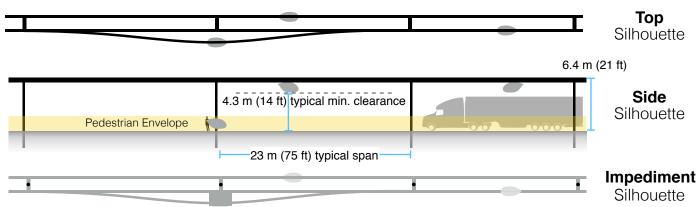

17 Less road maintenance from lower VMT

<sup>18</sup> Public land made available from less parking and lanes

19 Reduced emergency and police services for road-related incidents

<sup>20</sup> Less investment needed in road-based infrastructure (charging stations, signals, BRT, etc)

### Footprint calculations for minimum fee

Pod landing area: 1.5m x 2.5m with 3m minimum spacing

| 1  | Footprint Calculations                          | Metric                                 | Imperia                | I                 |

Summary

The average commute would be 3.5 times faster saving each commuter 295 hours per year.\*

At 0.44 USD per mile, a typical commute on Transit X is 17% less than public transit and 74% less than a Taxi.\*

Base fares are set for first 5 years, then adjusted by formula. A 20% discount on a shared pod and a 40% discount on a shared compartment. Trips are discounted proportional to their length reaching a maximum of a 40% discount on a 500 km trip. No congestion–based pricing. Fares are proportional to the median income of the area and inversely proportional to per capita use, so the more use of Transit X, the lower the base fare up a to 50% discount. The amount of market–rate fares must be less than the amount of discounted fares. Transit X Fair Fare Formula and Fair Freight Formula is universal and applies to all regions and all times.

### **Project Summary**

**Project** A fully-automated, solar-powered, micro-rail **Description** network. A transportation utility.

#### **Project type Privately-funded Public Transit**

Design, Build, Finance, Own, Operate, Maintain (DBFOOM)

Project equity US\$105 million (30% of total)

Cost to Gov't \$0

Structure Privately financed equity and debt

Debt term 10 years @ 7%

Equity terms A waterfall profit distribution per year with:

- 1. 90% until capital payback,
- 2. then 50% until Target% is reached

Transit X presents a preliminary proposal for a sustainable micro-rail network – a fleet of automated electric vehicles (pods) for passengers and freight on a local and regional podway providing equitable public transportation for

### Paulding County, GA

High capacity · High speed · Nonstop · 24/7 Solar powered · Zero Wait · Door-to-door · Resilient

#### About Transit X

Transit X finances, designs, builds, and operates solar-electric micro-rail public transit podways to supplant buses, trains, cars, and trucks. Transit X offers its service to governments and commercial developers. Maiden Flight was on Oct 29, 2018 and pilot projects started in 2018. First pilots will break ground in 2019 and begin operations in 2020. Transit X is a privately held company founded in 2015, based in Boston, Massachusetts.

#### **Important Notices**

The information contained in this document is not an offer to sell or a solicitation to buy any security. These materials and documents and information from which they are derived or which are referred to by or accessible from them may contain forward looking statements within the meaning of Section 27A of the Securities Act of 1933, Section 2E of the Securities Exchange Act of 1934 and the Private Securities Litigation Reform Act of 1995. All statements other than statements of historical fact are forward looking statements and are subject to risks and uncertainties. Forward looking statements generally can be identified by the use of forward looking terminology such as "may," "will," "expect," "intend," "estimate," "project," "anticipate," "believe" or "plan" or the negative thereof or variations thereon or similar terminology. Although Transit X believes that the expectations reflected in such forward looking statements are reasonable, it can give no assurance that such expectations will prove to be correct. All forward looking statements or circumstances after the date made. Except as required by law, Transit X undertakes no obligation to update any forward looking statements and information from which they are derived or which are referred to by or accessible from them represent Transit X's best estimate as to the allocation of the funding proceeds based upon its present business plan and financial condition. The costs and expenses to be incurred in pursuing the Company's business plan cannot be predicted with certainty. There can be no assurance that unforeseen events will not occur or that the Company's business plan will be achieved or that it will not be changed, and it is possible that the funding proceeds may be applied in a manner other than that described herein.
