

Transit X presents a preliminary proposal for a privately-financed, solar-powered micro-rail network — a fleet of automated electric vehicles (pods) for passengers and freight on a local and regional podway providing public transportation for

# Wuxi, Jiangsu, China

This proposal is downloadable at transitx.com/proposals/Transit X for Wuxi, Jiangsu, China.pdf

# High capacity · High speed · Nonstop · 24/7 Solar powered · Zero Wait · Door-to-door · Resilient

A 24-page companion Transit X Handbook is available at transitx.com/transitxhandbook.pdf

3,230 km network with 114,895 pods

95% of population within a 5 min. walk

Nonstop 72 km/h service to 13,050 stops

# Transit X proposes to build and operate a green, privately-financed micro-rail podway to carry passengers and freight for Wuxi that makes the Transit X service convenient to 95% of the population.

Transit X efficiently services both suburbs and cities and provides for a higher quality of life. See transitx.com for more details. This 3-minute video (transitx.com/ video) describes our innovative solution.

#### **Major benefits**

- · Reduce congestion
- · Provide parking relief
- Reduce pollution
- · Improve safety

The Transit X Handbook (<u>transitx.com/</u> <u>transitxhandbook.pdf</u>) answers many questions about our service, the company, our technology, and the way we address: congestion, parking, road safety, pedestrian safety, ADA compliance, sustainability, fares,

solar+storage, construction, aesthetics, operations, economic development, quality of service, security, station footprint, equitability, carbon footprint, transit integration, resiliency, reliability, rights-of-way, and open space.

# Congestion, parking, pollution, and safety

Most regions suffer from traffic congestion, limited parking, air pollution, and unsafe roads. Potential solutions are costly, but Transit X can solve these challenges without public funding. Transit X can integrate into the built environment, providing both short term relief and a long term solution.

# **High Capacity**

A single track carries 12,000 pods per hour (20,000 to 50,000 passengers per hour). Two boarding areas fit in a single car space and provide 2,000 boardings per hour.

# Zero Footprint and Minimal Disruption

Transit X features stops that don't interfere with pedestrians or other forms of transportation. We use easements alongside highway and roads and integrate utility lines and poles Non-stop interchanges fit above existing intersections. Factory-built tracks and posts enable fast installation with minimal disruption. Use of underground tunnels is an option. Posts are typically spaced at 23 m (25 yds).

#### No public funding

Transit X does not require government funding because our revenue from fares, freight, and advertising is greater than our costs. We have reduced or eliminated many costs of transportation including the cost of materials, land, construction, fuel,

debt service, and labor. Our projects are financed by investment banks and private equity firms.

# **Proven technology**

Our team and partners have built fully automated systems that are now in operation around the world. Transit X may look unique, but the underlying design is very similar to systems that have been operating for 40 years with an exemplary safety record. The rollout and maiden flight occurred on Oct 29, 2018 in Leominster, Massachusetts. The first Transit X system will be demonstrated by the end of 2019.

# **Service Quality**

Transit X provides on-demand, last-mile service that is superior to cars or buses. An operating agreement will guarantee high levels of availability and reliability. Our use of small vehicles (pods) makes this possible. By reducing car use, Transit X creates walkable and bike-friendly neighborhoods.

# Less pollution: Air, Sound, Light, Visual, Water

Transit X offers a much higher quality of life by eliminating many forms of pollution. Pods are quiet, efficient and have zero emissions. Pods offer less visual impact than the existing roads and vehicles, and utility lines can be hidden within the track. At night, there is no light pollution from headlights or taillights. Water pollution from road runoff is significantly reduced. Parking lots and roadways can be converted into green space and community paths as they become unnecessary.

# Sustainable and Efficient

Pods weigh only 45 kg (100 lbs) and achieve over 20 times the efficiency of electric cars. Solar, wind, and storage installed on our tracks and posts can provide 100% of the clean energy needed to power the system.

# More Transit & Fewer Cars

Transit X provides the convenience and privacy that people value in cars, yet without the negative impacts of personal cars. Transit X combines the best of mass transit and personal transportation modes which will lead to greater use of public transit and fewer cars.

# **De-risking Projects**

Transit X partners with large, established firms to provide fixed-price contracts for the engineering, certification, construction, and operations of a Transit X system. Theses partnerships enable Transit X to de-risk all of the major elements of the project, and provide performance guarantees. We work with local construction firms.

# Jobs and Workforce Development

Many regional jobs will be created to build a new transportation infrastructure, as well many new types of jobs will be created from economic growth. The majority of the construction jobs will be locally sourced and preferential hiring is given to those displaced by the transition.

### **Revenue Generator**

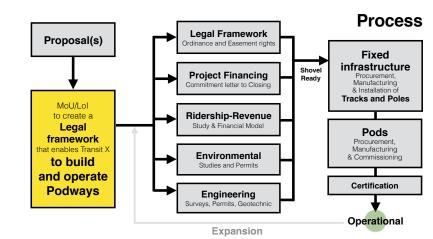

Not only does Transit X not require public financing, but the government and private easement owners receive 4-5% of gross revenue, which would be US\$271 million per year average over the first 10 years.

### Short and Long Term Solution

A project could be operational within 24 months from the start of a project. Transit X offers a rapidly-deployable solution that provides long term benefits. We would form a local company to build, operate, and maintain the network. At least 75% of the profits would be invested back into the region.

### **Moving Forward**

The diagram shows our process for a project. We submit a project proposal, then ask for a commitment for Transit X to build and operate a podway along rights-of-way easements. Example documents and a sample project schedule can be viewed at: <u>transitx.com/process</u>

#### Evaluation

Please review our preliminary proposal, and

then ask us any questions. We would be happy to provide further information, address specific concerns, or meet with specific people or groups. Any routes or coverage areas shown on the map are only preliminary suggestions and actual routes would be determined based on needs, rights-of-ways, utility corridors, location of trees, and many other factors.

We expect this proposal to be reviewed by one or more committees or working groups. Familiar transportation options, such as buses, light rail, subways, and ridesharing services (including autonomous vehicles) may have already been considered. Very few options offer the convenience of cars with at least the capacity of buses, and most, if not all, require public funding and subsidies.

Private cars have a dominant mode share because people like the privacy and convenience of a car — despite the significant risks and negative impact associated with them. People won't give up their cars unless the alternative is both better and cheaper. That is what Transit X can provide.

We hope you agree that this proposal offers a way to address your challenges in both the short and long term, providing an option that is better and lower risk than any alternative — including continuing with the status quo.

We hope you will conclude that moving forward with Transit X is an excellent opportunity to meet your current and future challenges.

Once we agree to move forward, we look to receive a commitment for Transit X to build and operate a podway along rights-of-way easements.

A podway network is rolled out in phases that each take less than 24 months.

#### **Other Resources**

The links below provide general information about Transit X:

- One minute video overview (transitx.com/video)
- <u>Transit X Handbook (transitx.com/transitxhandbook.pdf</u>)
- · Letters of Project Financing, Due Diligence, Contracts (transitx.com/letters.pdf)
- Memorandum of Understanding template (transitx.com/process/mou.html)
- Example Right-of-Way agreement (transitx.com/process/resolution.html)
- Operating Agreement (transitx.com/process/operating\_agreement.html)
- General Q & A (transitx.com/QandA.html)

# Impact of proposed network

1	Reduction in GHG emissions (metric tons CO2-eq)
2	Estimated cost to maintain public roadways
3	Reduced waste products
4	Travel time saved (non-stop travel and congestion)
5	Cost savings from reduced car ownership
6	Increase in household income (from time savings and car costs)
7	Reported injuries avoided
8	Lives saved (from safety)
9	Land freed from parking (24,058 acres)
12	Temperature reduction (from heat island effect & GHG reductions)
11	Health care savings (from pollution, injuries)

# **Model Inputs**

96	Typical travel time (in minutes) for 7 km trip	6	27
97	Fare/cost per km	\$0.11	\$0.62
98	Number of deaths per 100M passenger-km	0.00001	1
99	Number of injuries per 100M passenger-km	0.0006	62
100	Volume to park (cubic meters)	5.7	70.9

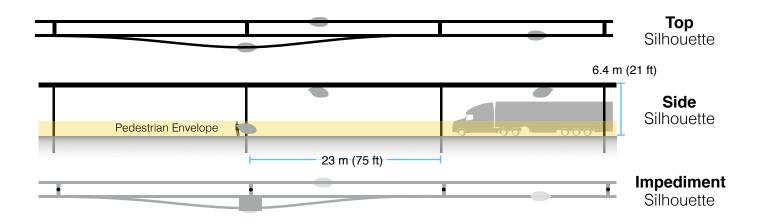

# **Taxes and Fees**

# 5% of gross revenue is paid for air rights and local taxes.

A minimum payment is based on the Footprint and the Transit X Commercial Rate (TXCR).

1	Air-rights and Local Taxe	S	(for calcul	ating minimums)
2	Total commercial land (estimated)	277,680,000	m <sup>2</sup>	acres
3	Total commercial gov't revenue (US\$)	\$83,304,000		566,467,200 RMB
4	TXCR (Transit X Commercial Rate)	\$0.30	per m <sup>2</sup>	2.0 RMB
5	TXCR is the yearly tax rate per land area. Calculation: total land area of commercial properties in the governmental region, divided by all the governmental income generated by those properties. The TXCR is used to calculate the minimum tax/fee.			
7	Private Easement Fees	For example		
8	4% of gross revenue	\$21.03	per route- meter	
9	Minimum per year	\$0.45	per route- meter	
10	<b>Government Fees a</b>	nd Taxes		
11	% of route on government easements	98%		
12	5% on government easements	\$332,923,779		2,263,881,696 RMB
13	1% on private easements	\$1,358,873		
14	Total air-rights and local taxes	\$334,282,651	per year	2,273,122,029 RMB
16	per resident	\$51		347 RMB
15	with a minimum of	\$1,440,205	per vear	9,793,392 RMB

Summary

The average commute would be 3.5 times faster saving each commuter 295 hours per year.\*

At 0.46 RMB per km, a typical commute on Transit X is 17% less than public transit and 74% less than a Taxi.\*

				_	Trip Length									
All prices in RMB			3		2 k	m			1	0	٢m		40 km

Base fares are set for first 5 years, then adjusted by formula. A 20% discount on a shared pod and a 40% discount on a shared compartment. Trips are discounted proportional to their length reaching a maximum of a 40% discount on a 500 km trip. No congestion–based pricing. Fares are proportional to the median income of the area and inversely proportional to per capita use, so the more use of Transit X, the lower the base fare up a to 50% discount. The amount of market–rate fares must be less than the amount of discounted fares. Transit X Fair Fare Formula and Fair Freight Formula is universal and applies to all regions and all times.

# **Fair Fare Formula**

# Fare rates are updated annually using this formula

	TT GHOR			
	Formula Name	Value	Units	Description of the value or model input
-1	Globallacama	<u> </u>	DMD	Global median household income. Updated annually based on most recent
1	GlobalIncome	68,000	RMB	standard published data.
2	AllTravel	23,000	km	Travel distance per household per year on any mode for trips under 1600 km. A
2	Airravei	23,000	km	global constant
3	PercentIncomeForTransport	20%		% of median household income for all transportation under 1600 km trips. A
				global constant.
4	GlobalRate	0.59	RMB/km	Global rate: GlobalIncome * PercentIncomeForTransport / AllTravel
5	IncomeFirst	\$102,000	RMB	Median household income at first stop (per person per day). External input.
				Based on reliable public data source updated annually. Median household income at destination per trip. External input. Based on
6	IncomeDest	\$153,000	RMB	reliable public data updated annually.
				Regional rate based on median income:
7	RegionalRate	0.89	RMB/km	MedianIncomeFirst * PercentIncomeForTransport / AllTravel
0	Underlageme Dete	0.00		Under global income adjustment:
8	UnderIncomeRate	0.00	RMB/km	if (RegionalRate < GlobalRate, GlobalRate - RegionalRate, 0)
9	NominalRate	0.89	RMB/km	Nominal rate: RegionalRate + UnderIncomeRate
10	RegionalFactor	1.00		Regional Fare Factor. Negotiated upfront to make network financially viable.
11	AdjustedRate	0.89	RMB/km	Regional adjusted rate: NominalRate * RegionalFactor
13	Population	6,553,000		Population in region. Updated annually based on trusted public data source.
12	UsageMaxDiscount	50%		Fare Discount when Transit X travel per household equals AllTravel. Global
				constant. Total passenger distance traveled previous calendar year. Based on expected
14	PassengerTravel	42,332,380,000	km	mode share for first 3 years. Based on actual passenger trips. Audited.
				Percent of Total Travel Per Capita on Transit X:
15	ModeShare	28%		PassengerTravel / (Population x AllTravel)
		0 70		Base rate for single-passenger pod (without discounts)
16	BaseRate	0.76	RMB/km	(1 - UsageMaxDiscount x min(1,ModeShare)) x AdjustedRate
17	SpecialRateFactor	2.20		Rate factor for water crossings or high-speed links. Global constant.
			<b>D1 D</b> <i>4</i>	Base rate for high-speed travel or water crossings:
18	SpecialBaseRate	1.68	RMB/km	BaseRate * SpecialRateFactor
19	DistanceDiscount	40%		Distance discount at max distance. Global constant.
20	MaxDistanceDiscount	500	km	Max distance discount. Global constant.
21	DistanceDiscountPerKm	0.000610	RMB/km	Discount amount per km:
	OrmierDirectoret			BaseRate x DistanceDiscount / MaxDistanceDiscount

				Cap on passenger travel distance at market rate:
37	MarketRateCap	25%		AverageDiscount x MarketFactor
00	MarkatTravalOre	7 906 004 100	km	Cap on passenger travel distance at market rate:
38	MarketTravelCap	7,806,994,123	km	DistanceBase x MarketRateCap

# **Project Summary**

Project Description	A fully-automated, solar-powered, micro- rail network. A transportation utility.						
Project type	<b>Privately-funded Public Transit</b> Design, Build, Finance, Own, Operate, Maintain (DBFOOM)						
Project cost	US\$12.67 billion						
Cost to Gov't	\$0						
Structure	Privately financed equity and debt						
Debt term	10 years @ 7%						
Equity terms	<ul><li>A waterfall profit distribution per year with:</li><li>1. 90% until capital payback,</li><li>2. then 50% until Target% is reached</li><li>3. then 10%</li></ul>						
Taxes & Fees	\$334,282,651 per year						
Benefits to society and environment	Extremely high						

# **Financials**

(US\$ in millions)

	Year 1	Total Years 1-12
Gross Revenues	2,242	65,025
Taxes and fees	112	3,251
Debt service	\$621	\$6,832

# ESG (Environmental, Social, Governance) Benefits

Clean energy	yes	Resiliency	yes
Energy security	yes	Sustainable	yes
Emissions-free	yes	Equitable	yes
GHG-free	yes	Recyclable materials	yes
Lowers pollution	yes	Affordable housing	yes
Clean water	yes	Improved Health	yes
Improved Safety	yes	Econ. Development	yes
New infrastructure	yes	Access to Food	yes
Equitable transport	yes	New job creation	yes

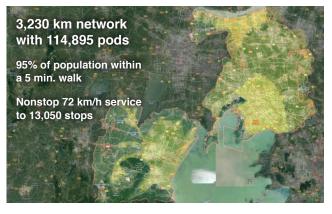

Transit X presents a preliminary proposal for a privately-financed, solarpowered public transit network — a fleet of fully-autonomous, shared, electric, 4-passenger vehicles (pods) on a local and regional podway

# Wuxi, Jiangsu, China

High capacity • High speed • Nonstop • 24/7 Solar powered • Zero Wait • Door-to-door • Resilient

#### About Transit X

Transit X finances, designs, builds, and operates solar-electric micro-rail public transit podways to supplant buses, trains, cars, and trucks. Transit X offers its service to governments and commercial developers. Maiden Flight was on Oct 29, 2018 and pilot projects started in 2018. First pilots will break ground in 2019 and begin operations in 2020. Transit X is a privately held company founded in 2015, based in Boston, Massachusetts.

# Status

	Now	Prior to close
Project financing	Letter of intent	Yes
Outdoor test system	Dec, 2019	Yes
Rider-Revenue study	Preliminary	Yes
Environmental study	Per region	Yes
Air rights	Per project	Yes
Permitting	Per project	Yes
Safety certification	In process	Yes
Construction firm	Per project	Yes
Design and major subs	Per project	Yes
<b>Operations &amp; Maint</b>	Yes	Yes
Utility relocation	Per project	Agreements

# 12-year Pro Forma

# **Model Inputs and Assumptions**

Route length (km)	3,230
Starting number of pods	37,915
Projected revenue growth	15%
Project Cost (Privately funded)	\$12,674,476,039
% Debt financed	70%
Debt	\$8,872,133,227
Equity	\$3,802,342,812
Debt payment (per year)	\$621,049,326

- Travel per year per pod (km) 168,191
- Revenue per vehicle-km (US\$) 0.35
  - OPEX as % of project cost 5%
    - Debt Interest rate 7%
      - Debt term (yrs) 10
- Profit share when below capital return 90%
  - Profit share when below Target IRR 50%
  - Profit share when above Target IRR 10%
